ROVSHAN RZAYEV

iOS Software Engineer · Swift · SwiftUI · UIKit

Baku, Azerbaijan · rovsen.rzayev.2009@gmail.com · +994 50 719 31 49 · linkedin.com/in/rovshanrzayev · github.com/rovsenrza

SUMMARY

iOS Software Engineer building native apps in Swift with SwiftUI and UIKit, with a focus on modular architecture, testable code and polished UI. At EPAM, contributed as an outstaff engineer to the modular-architecture and Design System refactoring of the national **MyGov** app. Independently built and shipped **Ru App Store**, a live iOS app storefront with its own backend and admin panel. Brings 3+ years of prior frontend experience (50+ websites delivered), which translates into a strong eye for UI detail, product thinking and direct work with clients and designers.

PROFESSIONAL EXPERIENCE

EPAM Systems — *iOS Software Engineer* Baku · Apr 2026 – Sep 2026

- Contributed as an EPAM outstaff engineer to the **MyGov** iOS app refactoring: helped move the codebase toward a modular architecture, built reusable components and extended the product Design System.
- Wrote production-oriented Swift with SwiftUI/UIKit following MVVM-C and SOLID, working alongside backend, QA and design teams in Agile/Scrum sprints with code review.
- Delivered the **Green & Tasty** restaurant app in the EPAM iOS program: layered SwiftUI architecture with local Swift packages, token-refresh networking, SwiftLint and **740+ automated tests** (unit, API-contract and UI).

Freelance — *iOS Developer* Remote · Nov 2025 – Present

- Design, build and ship iOS apps for clients end to end — requirements, architecture, implementation, TestFlight and App Store delivery.
- Built **Ru App Store** (ruappstore.com): native SwiftUI storefront with Today, Apps, Search, Library and Account tabs, deep links and a test suite, backed by a Laravel REST API (OpenAPI contract) and an operator admin panel with TOTP sign-in.

Okmedia MMC — *Frontend Developer* Baku · Feb 2023 – Apr 2026

- Built and maintained responsive web applications in React and JavaScript, turning requirements and Figma designs into reusable UI components; collaborated on feature delivery, bug fixing and usability improvements.

Economic Scientific Research Institution — *Leading Researcher* Baku · Sep 2025 – Nov 2025

- Supported the modernization of the institution's official website, improving information structure, consistency and maintainability.

SELECTED IOS PROJECTS

Ru App Store — ruappstore.com · SwiftUI, URLSession, XCTest, Laravel, OpenAPI
Live iOS app storefront: App Store-style SwiftUI client, REST backend, customer portal and admin panel built as one monorepo.

Green & Tasty — github.com/rovsenrza/Green-Tasty · SwiftUI, Swift Packages, Kingfisher, XCTest, Swift Testing, XCUITest, SwiftLint
Restaurant app with reservations, pre-orders, feedback and role-based customer / waiter / admin flows; 743 passing tests.

Marketplace — github.com/rovsenrza/MarketPlace-ECommerce · UIKit, SwiftUI, Combine, SnapKit, Firebase
Two native apps built in the ABB Tech bootcamp: a UIKit customer app (Coordinator + MVVM, Google & Apple Sign-In, cart, checkout, real-time chat) and a SwiftUI admin app.

TECHNICAL SKILLS

Languages & UI: Swift, Objective-C, SwiftUI, UIKit, Combine, Swift Concurrency, SnapKit, Lottie

Architecture: MVVM-C, MVVM, MVC, VIPER, Clean Architecture, SOLID, Dependency Injection, Modular Architecture, Design Systems

Frameworks & data: Foundation, URLSession, Alamofire, Moya, Core Data, Core Location, MapKit, UserNotifications, Firebase, Kingfisher, REST APIs

Quality & delivery: XCTest, Swift Testing, XCUITest, TDD, Code Review, CI/CD, Git, GitHub, GitLab, SPM, CocoaPods, Xcode, TestFlight, App Store Connect, Jira, Agile/Scrum

EDUCATION & LANGUAGES

Azerbaijan Technical University — Computer Modelling (in progress) 2025 – 2027
Azerbaijan State Oil and Industry University — BSc, Information Security 2021 – 2025
ABB Tech Academy — iOS Development program 2025 – 2026
Div Academy — Front-End Development program 2022 – 2023
